

Mr. OGILBY's
D — AND *Phelips*
WILLIAM MORGAN's
POCKET BOOK
OF THE
ROADS,

With their Computed and Measured Distances, and the Distinction of Market and Post-Towns.

The Fourth Impression.

To which is added several *Roads*, and above Five Hundred *Market-Towns*.

With a Table for the ready finding any *Road*, *City*, or *Market-Town*, and their Distance from *LONDON*.

And a Sheet Map of *England* fitted to bind with the Book.

By WILLIAM MORGAN,
Cosmographer to Their Majesties.

L O N D O N:

Printed for the Author, and *Christopher Wilkinson*, and Sold by them at their Houses, next the *Blew Boar* in *Ludgate-Street*, and the *Black Boy* in *Fleet-Street*, and by the several *Book-sellers* in *London* and *Westminster*. 1689.

ADVERTISEMENT.

John Ogilby and William Morgan being thereunto pointed, and their Method approved by King Charles the Second, and the Lords of the Council, and having in prosecution thereof, with many Years Travel, and the Expence of 7000 l. published the First Volume of *Britannia*, containing an Hundred whole Sheet Maps of the Roads, &c. did in the year 1676. publish an Epitome of the same, whereof you have here the fourth Impression; to which is added some Roads, and in the Tables more than 500 Marked Towns, with their distance from *London*, &c.

We have also added several *Towns*, *Ports*, *Harbours*, *Creeks* and *Bays* in the Map which is fitted and annexed to the Book, and both together are a compleat Direction for Travelling all over *England* and *Wales*.

For it being next to impossible in a small Volume to lay down all the Roads that every man may have occasion to travel, because from one and the same place a thousand men may have a thousand several ways to go; therefore we have added the Map, that if you do not find in the Book the Road you would go, by finding in the Map the place where you are, and whither you would go, you may easily see what Road will bring you thither.

For Example; would you go from *Northampton* to *York*, for which you have not the direct Road in the Book, but by the Map you find your way is from *Northampton* to *Wellingborough*, and so to *Stilton*, and then you are in the Road to *York*.

The Price is as formerly, $\left\{ \begin{array}{l} \text{The Book 1 s.} \\ \text{The Map 1 s.} \end{array} \right.$

We have also made the Maps of the Roads portable, where every thing that is remarkable on or near the Road, and all the turnings out of the Road, are plainly and truly described at the Scale of a Mile in one Inch.

The Compleat Map of the Survey of *London*, &c. with the additional Buildings since 1682. is finished and will be suddenly published.

EXPLANATION.

IN each Road you have, first, named the Place whence, and to which the Road goeth, as Num. 1. fol. 13. from London to Aberistwith, and in the Cross Roads, Cambridge to Coventry, &c. then follows the Names and particular Distance of each remarkable Place you pass.

The Numbers under C. shews you the Vulgar Computation, the Numbers under M. F. gives you the Measured Distance by Miles and Furlongs.

And by casting up the Numbers, you have the Distance of any one Town from another; as fol. 13. N°. 1. from London to Stoken-Church, you will find it by Computation 35 Miles, and by Measure 39 Miles 2 Furlongs, of which 8 makes a Mile; And so of the rest.

But we have given you the Totals of the Computation, and Measure of each Road, with the Cities and Market-Towns thereon, in the following Tables.

Where the Computation is omitted, that Town is not a Mile from the next, or admits of some odd parts of a Mile; and in such cases we have given the Computed Distance from the Town before, to the Town following the Omission.

As in the Road to Aberistwith, from Kensington Gravel-Pits to Shepherds-Bush, it is by Measure 1 Mile 7 Furlongs, but the Computation is omitted till you come to Acton, which is accounted 3 Miles from Kensington Gravel-Pits.

We have divided the Roads under Two Heads, Roads from London, and Cross-Roads.

In the Roads from London there are divers that go part of the Way, and then turn out of the great Roads, and to avoid repeating the

Explanation.

Towns and their Distances, till you come to place where you leave the Great Road, you referred to the Road out of which each Branch issues.

As in the Road from London to Buckingham you are directed to Num. 1. fol. 13. for the Way as far as Uxbridge, and in the Road from London to Montgomery, you are referred to Num. 1. fol. 13. for the Way as far as Worcester, where the Road to Aberystwyth and the Road to Montgomery part, and so the rest.

We begin our Measures of the Roads the Standard in Cornhill, London, and continue them through every Town, which makes the Measure so much exceed the Computation.

The Cross Roads are such as lead from one City or great Town to another, and have no Competition or Reference: They are placed Alphabetically, where the Town that begins the Road takes place, as the Town that ends the Road doth in those from London; but the Table direct you readily to find either.

*For Distinction Cities are in CAPITAL Market-Towns in Italick; (a) and Post-Towns markt thus *, as fol. 13. * Waltham Cross is a Post, and not a Market-Town Hodsdon is a Market, and not a Post-Town * Ware is both Market and Post, &c.*

(a) But fol. 14. Hounslow, fol. 15. Glamford, fol. 19. Darleston, and fol. 20. Chidleigh, are by mistake in Roman.

A Table of the Market Towns, and their distance from London, &c.

The Numbers under C. is the Computed Distance, under M. F. the Measure by Miles and Furlongs; for Example, against *Barwick*, under C. M. F. you have 262, 339, 2; that is to say, from *London* to *Barwick* is by Computation 262 Miles, by Measure it is 339 Miles, and 2 Furlongs. The figure before the Name directs you to fol. 13. where you have the Road to *Barwick*, and the distance of each Town; and so of the rest.
